TABDEELI KI REPORT

✓ Theek ho gaya

Fee discount do baar lag raha tha, aur exam center form har Jamia dikha raha tha

PROJECT School Board Panel (demo) BRANCH `fix/voucher-discount-jamia-scope` COMMIT `4f9c2e1` TAREEKH 2026-10-28

TAYYAR KIYA Claude (AI coding agent) KIS KE KEHNE PAR Sana Iqbal, QA lead

01 Khulasa

Fee aur exam center wali screens ki testing ke dauran do kharabiyan milin. Dono is branch par theek kar di gayi hain.

Voucher banate waqt sibling discount do baar kat raha tha, is liye staging batch ke 312 voucher PKR 450 kam ke ban rahe the. Naya exam center form nazim ko har Jamia dikhata tha, aur jo bhi Jamia id bheji jaati us ka center save kar deta tha. Ab voucher loop wohi raqam istemal karta hai jo query pehle hi discount kaat kar deti hai, aur form aur us ka save dono role ke hisaab se chalne wale `ModuleHelper::jamiaList()` se guzarte hain.

Dono qawaid ke liye naye feature test likhe gaye, aur ek insaan ne sab se kam ikhtiyar wale role se login kar ke yahi jaanch hath se dobara ki.

02 Pehle kya masla tha

Har masla waise hi jaise mila, kuch badalne se pehle.

SANGEEN P1 **Voucher banate waqt fee discount do baar lag raha tha**

KAHAN `app/Http/Controllers/VoucherController.php` mein `VoucherController::generate()` KIS NE PAKRA Test HAL F1

KYA NAZAR AAYA

Jin talaba ka sibling discount tha, un ke voucher sahi raqam se kam ban rahe the. Misaal: fee 5,000 aur 10% discount par 4,500 banna chahiye tha; voucher par 4,050 aaya.

ASAL WAJAH

Fee query pehle hi `net_amount` discount kaat kar deti hai. `voucher_detail` ki rows likhne wala loop phir discount doosri baar kaat deta tha. Dono jagah yeh samjha gaya ke discount doosri jagah nahi lagta, aur kisi test mein discount wala talib-e-ilm shamil nahi tha.

ASAR

Staging batch B-17 ke 1,240 mein se 312 voucher PKR 450 kam the: board taqreeban PKR 140,400 wusool na karta. Baad mein gharon se baqi raqam maangni parti.

SABOOT

> Voucher V-2026-00417: fee 5,000, discount 10%, chhapa 4,050.
> Usi talib-e-ilm ke liye query ka nateeja pehle hi `net_amount = 4500` dikha raha tha.

INTEHAI SANGEEN P2 **Exam center form nazim ko har Jamia dikhata hai aur kisi bhi Jamia ki id qabool kar leta hai**

KAHAN `ExamCenterController::create()` aur `store()` KIS NE PAKRA Insaan HAL F2 F3

KYA NAZAR AAYA

Ek nazim, jo sirf apni Jamia sambhalta hai, ne naya exam center form khola to dropdown mein tamam 287 enabled Jamiaat nazar aayin. Doosri Jamia chun kar save karna bhi kaam kar gaya.

ASAL WAJAH

Form ka dropdown `Jamia::where('is_enabled', 1)->get()` se ban raha tha, project ke helper `ModuleHelper::jamiaList()` se nahi, jo superadmin / nazim / staff ki taqseem lagata hai. Save wala action bheji gayi `jamia_id` par bharosa kar leta tha aur use user ki apni list se kabhi nahi milata tha.

ASAR

Koi bhi nazim tamam Jamiaat ke naam parh sakta tha aur un Jamiaat ke exam center bana sakta tha jo us ke paas nahi. Is se Jamiaat ke darmiyan data ki alehdgi toot jaati hai aur umeedwar ghalat center mein bheje ja sakte hain.

SABOOT

> Test user `nazim_demo` (Jamia #12) se login kiya: dropdown mein 287 Jamiaat thin. `jamia_id=45` ke saath POST ne HTTP 302 diya aur Jamia #45 ka center ban gaya.

03 Kya theek kiya

Kya badla, yeh hal sahi kyun hai, aur code pehle aur baad mein.

F1 Query se aayi discount wali raqam ko waise hi istemal karo

KIS MASLE KA HAL

P1 Voucher banate waqt fee discount do baar lag raha tha

KYA BADLA

Voucher loop se doosri baar discount wala hisaab hata diya. Ab har `voucher_detail` row query wala `net_amount` hi save karti hai. Ek feature test shamil kiya jis mein ek discount wala aur ek baghair discount wala talib-e-ilm hai.

YEH SAHI KYUN HAI

Ab discount sirf ek jagah kat-ta hai, yani query mein, aur fee register ki report bhi yahi query parhti hai, is liye voucher aur register aapas mein milte hain. Naya test purane code par fail hota hai (4,050) aur naye code par pass hota hai (4,500).

FILES

`app/Http/Controllers/VoucherController.php` `tests/Feature/VoucherDiscountTest.php`

– PEHLE PHP

```
    foreach ($rows as $row) {
        // net_amount comes from the query, already discounted
-       $amount = $row->net_amount
-           - ($row->net_amount * $row->discount_pct / 100);
        VoucherDetail::create([
            'voucher_id' => $voucher->id,
            'std_id'     => $row->std_id,
-           'amount'     => $amount,
        ]);
    }
```

+ BAAD MEIN PHP

```
    foreach ($rows as $row) {
        // net_amount comes from the query, already discounted
        VoucherDetail::create([
            'voucher_id' => $voucher->id,
            'std_id'     => $row->std_id,
+           'amount'     => $row->net_amount,
        ]);
    }
```

F2 Jamia dropdown role ke hisaab se chalne wale helper se banao

KIS MASLE KA HAL

P2 Exam center form nazim ko har Jamia dikhata hai aur kisi bhi Jamia ki id qabool kar leta hai

KYA BADLA

`create()` ab `ModuleHelper::jamiaList()` call karta hai, wohi helper jo project ke baqi forms pehle se istemal karte hain.

YEH SAHI KYUN HAI

Helper teen tarah ki role taqseem lagata hai (superadmin sab dekhta hai, nazim sirf apni Jamia, staff sirf woh Jamiaat jo us se mapped hain), is liye form qaida dobara likhne ke bajaye project ka qaida hi follow karta hai.

FILES

`app/Http/Controllers/ExamCenterController.php`

- PEHLE PHP

```
public function create()
{
-       $jamias = Jamia::where('is_enabled', 1)->get();

        return view('exam_center.add',
compact('jamias'));
}
```

+ BAAD MEIN PHP

```
public function create()
{
+       $jamias = ModuleHelper::jamiaList();

        return view('exam_center.add',
compact('jamias'));
}
```

F3 Jo Jamia id user istemal nahi kar sakta, use rad karo

KIS MASLE KA HAL

P2 Exam center form nazim ko har Jamia dikhata hai aur kisi bhi Jamia ki id qabool kar leta hai

KYA BADLA

`store()` ab `jamia_id` ko `ModuleHelper::jamiaList()` ki ids se validate karta hai. Jaali id ab aam error message ke saath validation mein fail hoti hai.

YEH SAHI KYUN HAI

Dropdown mein option chhupana security check nahi hai: server ko jo value milti hai use khud jaanchna hota hai. Validation kisi bhi write se pehle chalti hai, is liye jaali id par kuch save nahi hota.

FILES

`app/Http/Controllers/ExamCenterController.php` `tests/Feature/ExamCenterScopeTest.php`

- PEHLE PHP

```
$request->validate([
-       'jamia_id' => 'required|integer',
        'title'    => 'required|string|max:150',
]);
```

+ BAAD MEIN PHP

```
+ $allowed = ModuleHelper::jamiaList()->pluck('id')->all();
+
$request->validate([
+       'jamia_id' => ['required', 'integer', Rule::in($allowed)],
        'title'    => 'required|string|max:150',
]);
```

04 Jaanch

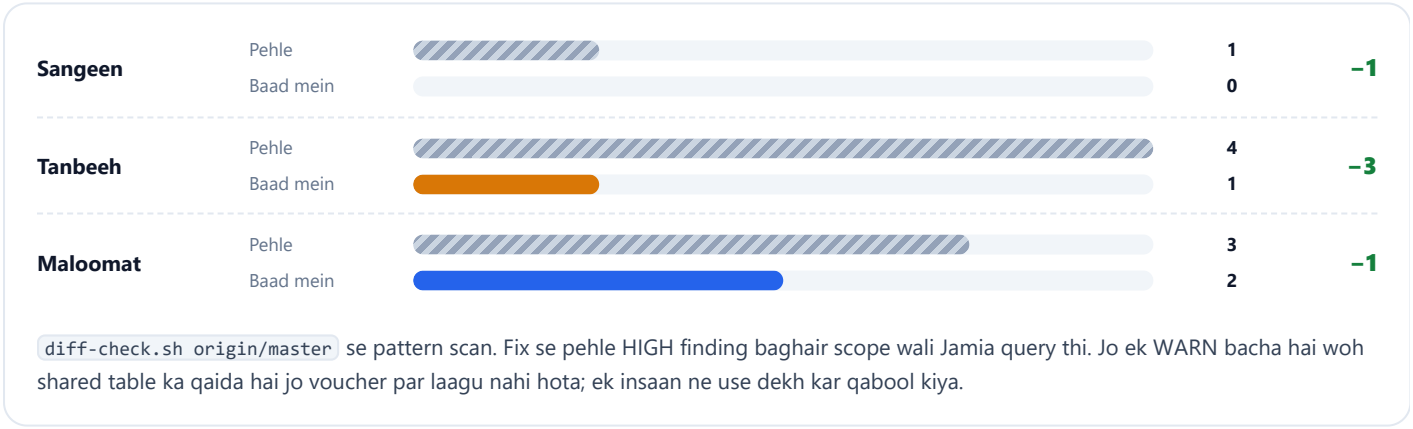

Tabdeeli ko kaise jaancha gaya: AI agent ne bhi aur insaanon ne bhi.

7 jaanchein: AI ne 2, insaanon ne 3, dono ne 2.

JAANCH	KIS NE JAANCHA	NATEEJA	TAFSEEL
Feature test: discount wale talib-e-ilm ka voucher 4,500 hai	AI	✓ Kamyab	`php artisan test --filter=VoucherDiscountTest` : 2 test, 6 assertions, local SQLite test database par.
Batch B-17 local copy par dobara banaya aur fee register se milaya	AI + insaan	✓ Kamyab	312 voucher badle, har ek +450. Batch ka total ab register se milta hai.
`nazim_demo` se login kar ke exam center form khola	Insaan	✓ Kamyab	Dropdown mein sirf Jamia #12 nazar aati hai.
Doosri Jamia ki id ke saath jaali POST	Insaan	✓ Kamyab	`jamia_id=45` validation error ke saath rad hoti hai; koi row nahi banti.
Superadmin aur staff user ab bhi apni poori list dekhte hain	AI + insaan	✓ Kamyab	Superadmin ko 287 Jamiaat nazar aati hain; 3 Jamiaat se mapped staff user ko wohi 3.
Baqi forms jo Jamia ka dropdown banate hain	Insaan	◐ Adhoora	19 mein se 14 forms jaanche gaye aur theek hain. 5 ab bhi Jamia seedha query karte hain (baqi khatre dekhein).
Do voucher generation ek hi waqt mein	AI	○ Nahi chalaya	Local setup par queue worker nahi hai. Baqi khatron mein likha hai.

05 Scan: pehle aur baad mein

Fix se pehle aur baad mein tabdeeli ka red-flag scan.

`diff-check.sh origin/master` se pattern scan. Fix se pehle HIGH finding baghair scope wali Jamia query thi. Jo ek WARN bacha hai woh shared table ka qaida hai jo voucher par laagu nahi hota; ek insaan ne use dekh kar qabool kiya.

06 Ijazatein

Woh khatarnak kaam jin ke liye agent ne ijazat maangi, aur jo nuqsan us ne bataya.

KAAM	MUMKINA NUQSAN	FAISLA	KAB
Feature tests chalana, jo test database ko reset karte hain	RefreshDatabase us database ko mita deta hai jis ki taraf tests ishara karte hain. Pehle `.env.testing` dekha: woh local SQLite file ki taraf hai, kisi shared server ki taraf nahi.	✓ Manzoor	2026-10-28 11:20
Shared staging server par voucher batch B-17 dobara banana. User ne mehfooz rasta chuna: local copy.	Doosre testers ke istemal wale 1,240 voucher badal jaate, aur backup ke baghair yeh wapas nahi ho sakta.	↪ Mehfooz rasta	2026-10-28 12:05

08 Baqi khatre

Jo abhi poori tarah mehfooz nahi. Is tabdeeli par bharosa karne se pehle inhein parhein.

! Paanch aur forms ab bhi Jamia seedha query karte hain. Woh is kaam ka hissa nahi the aur abhi theek nahi hue.

! Fix se pehle chhape gaye batch B-17 ke voucher ghalat raqam ke hain; inhein dobara jaari karna hoga.

! Do voucher generation ek hi waqt mein chalne ki testing nahi hui.

09 Agle qadam

1. Finance manzoori de, phir batch B-17 ke 312 mutasira voucher dobara jaari kiye jaayein.
2. Baqi paanch forms ko `ModuleHelper::jamiaList()` par le aayein, har ek ki alag chhoti tabdeeli.
3. `.claude/safe-code-rules.tsv` mein project ka qaida shamil karein taake har nayi tabdeeli mein seedhi Jamia query pakdi jaaye.
4. Merge se pehle doosra developer diff parhe.

Yeh report safe-ai-coding 2.0.0 ne 2026-10-29 10:54 UTC+05:00 par banayi · Sami Hussain, x8code.com · github.com/sami-hussain-dev/safe-ai-coding

Scan aur test khatra kam karte hain magar yeh saabit nahi karte ke code mehfooz hai; har tabdeeli ko ek insaan ko zaroor dekhna chahiye.
